Made in Italy

Mission and Vision

SOEMA was born in 1985 by two progressive engineers who began their cooperation through the production of electronic mixer taps/faucets

Our philosophy is focused on **5 main points**:

- **Simple products**: design and project "easy" products is much more difficult than to create complicated products , cheaper in price but with a shorter life time (i.e. "fast food products")
- **Easy to install**: we always think about the installer. Even the least skilled has to mount our products in the easiest, quickest and safest way.
- **Easy to clean**: all products are designed to grant maximum hygiene for end users and easy cleaning (e.g. rounded corners, flush hardware, not porous solid surfaces; etc.)
- **Easy servicing**: the structure/layout of our range is studied to allow a simple, secure and fast solution with affordable spare parts available in a very short terms. This is always important but especially when products are in high-traffic areas.
- **Durability**: our products are engineered to grant a long life against vandalism, heavy duty, unproper usage

Products

Sanitary Equipment & Electronic Fixtures

- Electronic Washbasin Taps
- Electronic Sink taps
- Electronic Flush mounted Taps
- Electronic Soap Dispensers
- Electronic Hand Dryers
- Electronic Stainless steel Hand washing Units – Tanks
- Electronic Stainless steel Sterilizers
- Electronic Handwashing units in Acrial- Corian
- Electronic WC Flushing Systems
- Antibacterial Self Tip-up Toilet Seats
- Electronic Urinals
- Electronic Flushing Systems for Urinals
- Electronic Shower Controls
- Electronic Shower Poles
- Electronic Shower Tunnels-Barrier Controls
- Electronic Shower Arches
- Complete Disability Sanitary Fittings
- Electronic or Manual WC Units for Disabled

Modular Fixtures in CHPL and Glass

- Toilet partitions
- Shower partitions
- Changing boxes
- Urinal Dividers
- Bathroom Handwashing Tops
- Lockers
- Benches
- Doors
- Sliding Doors

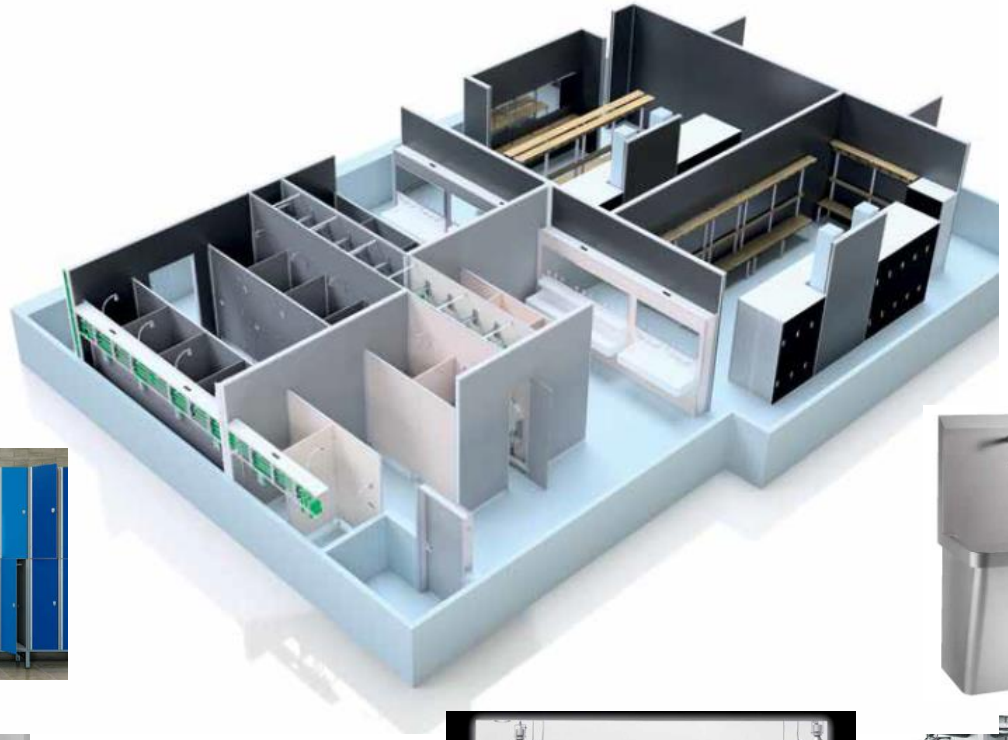

VERY IMPORTANT!!!

**Products are designed and engineered for specific uses.
Most of them are also manufactured in-house so that we can keep under control all the processes. It means we can even grant a just-in-time after sales servicing for small components, too.**

Handcrafted in Italy

ELECTRONIC SOAP DISPENSER + **ELECTRONIC FAUCET** + **ELECTRONIC HAND DRYER** =

MULTICONSOLE = 1 spot >>> 3 functions

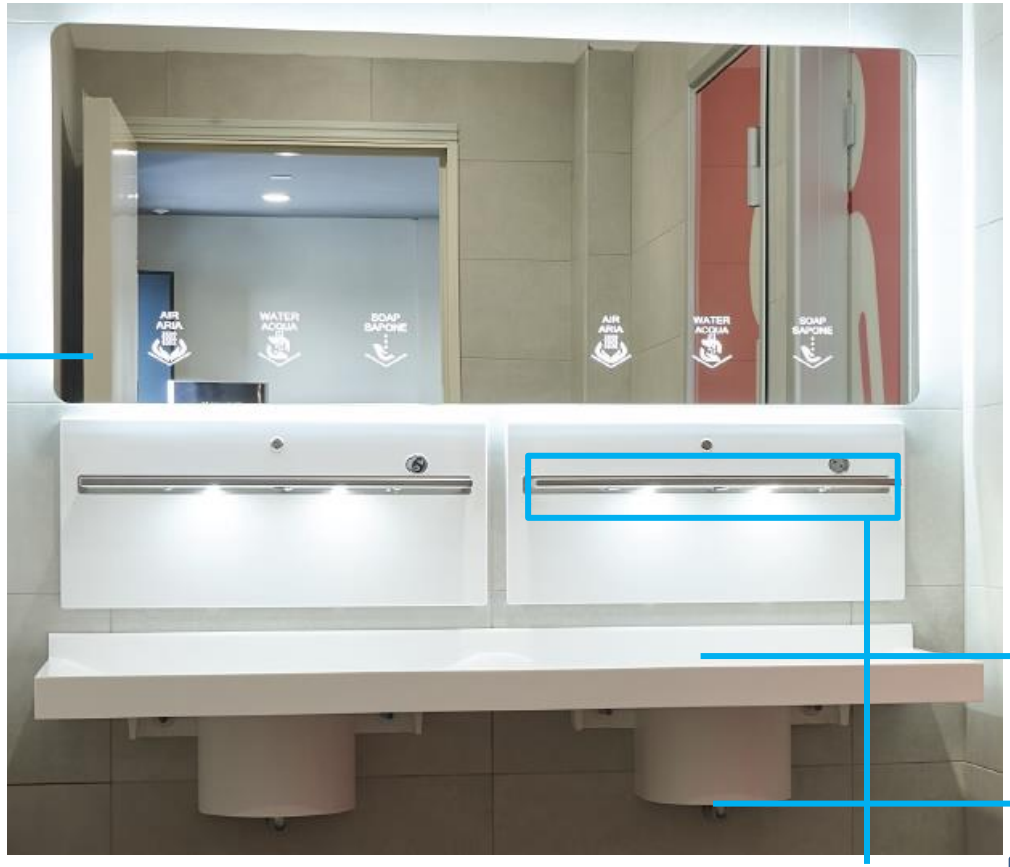

Handcrafted in Italy

SOEMA® Handcrafted Technology

FOCUS ON INTEGRA (the “integrated” and self-sufficient hand washing unit)

A mirror with perimetrical LED lighting and backlit icons is also available as an option

A vanity top with integrated basin made in acrylic based solid surface

All pipings are hidden by an integrated cover in acrylic based solid surface

Soap dispenser, tap/faucet, hand-dryer are all electronically controlled and integrated in a single 10mm plate.
The black splash in Corian also brings all components that can be easily maintained from the front

OUR MATERIALS…

C-HPL
Compact **H**igh-**P**ressure **L**aminate

Stratified HPL is a material of excellent quality due to its functional and aesthetic potential.
Its characteristics of **resistance to wear and steam, hygiene and versatility in cutting and assembly**, make it the ideal material for the creation of self-supporting furnishing systems.

Also ideal for all applications where it is necessary **to combine resistance and design**, the Stratified HPL is the most qualitatively reliable material and the richest in aesthetic features also for the creation of contemporary design complements in general. In addition, **the Stratified HPL maintains its aesthetic and performance characteristics unaltered for the entire life cycle**.

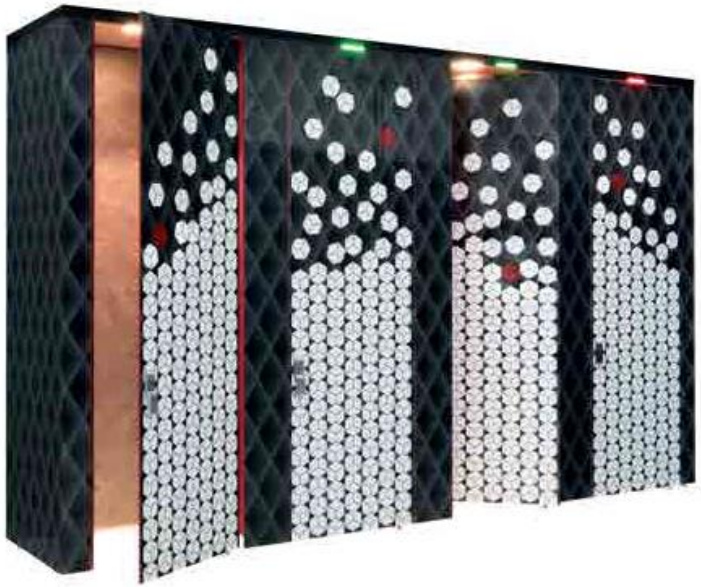

It consists internally of layers of cellulosic fibers impregnated with phenolic resins and on the surface by one or more layers of cellulosic fibers with an aesthetic function, impregnated with thermosetting resins and bonded together by a high-pressure process in compliance with the EN 438: 2005 - Part 4 standard.

SOEMA®
Handcrafted Technology

OUR MATERIALS…

Glass

The Glass partition boxes are a safe, functional, lively and original way of furnishing high traffic sanitary areas and changing rooms by merging elegance and usefulness through skills and handicraft.

The Glass box series are created **by coupling two colour panels in tempered glass: a 5 + 5mm for Colour Glass lines** and **8+5mm for Imperial line** (the full height solution) sandwich panel.

Soema uses RAL water-based colours and a non-toxic gluey substance to join the glass panels together, guaranteeing **maximum safety** and **respect for the environment** and ensuring a bright colour effect.

All hardware and accessories are designed by Soema and are produced with a handcrafted technological method from high resistant anodised aluminium with satin finish.

Handcrafted Technology

OUR MATERIALS…

Porcelain stoneware (gres)

Porcelain has always been the most used material for bathroom tilings.

Soema has created a new line of cubicles with unique characteristics, by using a **very reliable material**: porcelain stoneware.
Its conventional use becomes out of the ordinary for the new and revolutionary application.

Over the years, the production of ceramics has improved and has generated **slabs of ever larger dimensions and smaller thicknesses, allowing the creation of doors and walls without joints.**

The panels, made of a **6+6mm stoneware slabs and an intermediate sheet of stabilizing material (2mm in C-HPL)**, are suitable for use in high-traffic areas bathrooms. Their surface has **better characteristics than any other material** where **hygiene and cleanliness are essential elements**.

SOEMA®
Handcrafted Technology

OPERA (full height solution – floor to ceiling)

Height 2000> 3000mm
"Floating" solution without feet and metal profiles visible from the front
Independent of the ceiling
14mm C-HPL panels

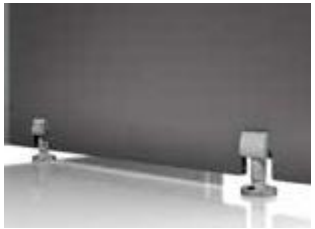

Aluminum hinges and stainless steel locks inserted in the thickness of the C-HPL laminate without any visible screw
(= no protrusions> easy cleaning> savings)
Emergency opening (+ security)

Full stainless steel lock (vandal resistant)

30mm-floor clearance (+privacy)

WC and SHOWER CUBICLES IN C-HPL

Handcrafted in Italy

SOEMA
Handcrafted Technology

ARENA

"Floating" solution without feet and metal profiles visible from the front
Height 2230mm
Floor clearance 80mm
14mm C-HPL panels

Aluminum hinges inserted in the thickness of the laminate (no visible screws) with self-closing system (easy opening) and shock absorber (no noise = comfort of use)

Prefabricated systems with fixing solutions that are simple to be assembled but absolutely reliable and resistant

WC and SHOWER CUBICLES IN C-HPL

Handcrafted in Italy

IMPERIAL GLASS (full height - floor to ceiling)

Full height solution (height range: 2000> 3000mm)
"Floating" solution without feet and metal profiles visible from the front (Floor clearance: 30mm)

Independent from the ceiling
Glass doors 8 + 5mm and dividers 6 + 6mm coupled with Hot Melt Polyurethane resin and water-painted

As an option, you can customize the glasses with a decoration in digitized graphics

Door: 110 ° external opening, guaranteed by a fixed eccentric upper door stop on the horizontal stabilizer bar of each door
Standard door size: 1000mm
Actual floor clearance: 30 mm

Lock in AISI316 stainless steel and locking lever in vandal-proof solid stainless steel

Ergonomic handles in strong aluminium specifically designed for disabled.
Busy/free indicators

THE LATEST STUNNING NEWS…

COPERNICO

The **ABSENCE of contact is the ESSENCE of Soema** that, for over 35 years, is guaranteeing our health by perfecting the concept of **high HYGIENE in every project**.
Soema is proud to introduce in the market **COPERNICO**: **the FIRST AUTOMATIC DOOR applied to THIN PANELS**.

- Opening and closing automatic system with sensors for cubicle doors
- Internal person detection sensor
- Speed and strength opening adjustment
- Manual mode available (Internal and external emergency opening)
- Safety system to prevent accidents (clutch system)
- Stand-by mode for easy cleaning
- Easy access (disabled and children)
- Perfect solution for any commercial bathroom
- Best system to minimize contamination risks
